Volume 62 (2001)

Bin, L. **62**, 155
Blobel, B. **62**, 51
Burns, C.M. **62**, 79
Butte, A. **62**, 27

Cameo, S.C. **62**, 143
Cesnik, B. **62**, 121
Chae, Y.M. **62**, 103
Chen, Y.-m. **62**, 11
Cheung, A. **62**, 113
Cheung, C. **62**, 113
Cheung, J. **62**, 113
Cheung, N.T. **62**, 101, 113
Cho, K.W. **62**, 103
Chou, S.-c. **62**, 11
Chu, S. **62**, 121
C Lun, K. **62**, 155
Copeland, K.L. **62**, 181

Doyle, D.J. **62**, 79

Fung, H. **62**, 113
Fung, K.W. **62**, 113
Fung, V. **62**, 113

Hajdukiewicz, J.R. **62**, 79
Ho, L.M. **62**, 189
Ho, L.-M. **62**, 143
Ho, S.H. **62**, 103
Ho, W. **62**, 113
Hsieh, D. **62**, 135
Hsu, C.-Y. **62**, 135

Ji, S.H. **62**, 103
Johnston, J. **62**, 101
Johnston, J.M. **62**, 143

Kohane, I.S. **62**, 27
Kreinovich, V. **62**, 165
Kwok, S. **62**, 175

Lam, M.K. **62**, 175
Lee, D.H. **62**, 103
Lee, Y.-L. **62**, 135
Leung, C.H.S. **62**, 175
Leung, G.M. **62**, 143
Leung, R.M.W. **62**, 189
Lin, F.-r. **62**, 11
Li, Y.-C. **62**, 135

Mandl, K.D. **62**, 27
McGhee, S. **62**, 101
McGhee, S.M. **62**, 189
Milgram, P. **62**, 79

Ng, C.P. **62**, 175
Nigrin, D.J. **62**, 27

Oh, D.H. **62**, 27

Pan, S.-m. **62**, 11
Phuong, N.H. **62**, 165
Poon, W.S. **62**, 175

Riva, A. **62**, 27
Roberts, J.M. **62**, 181
Roger-France, F. **62**, 51

Sadan, B. **62**, 41
Shung, E. **62**, 113
Szolovits, P. **62**, 27

Tierney, W.M. **62**, 1

Vicente, K.J. **62**, 79

Wai, S. **62**, 175
Wong, F.-K. **62**, 143

Subject index

Volume 62 (2001)

Abstraction hierarchy; Medical informatics; Design framework; Decision support **62**, 79

Access rights; Confidentiality; Privacy; Data ownership; Computer-based medical record **62**, 41

Association; Clinical pathways; Data mining; Time dependency pattern; Sequence pattern **62**, 11

Beside care; Evaluation of hand-held computers; Nursing **62**, 189

Citizen; Website; Clinical information; Informatics; Internet **62**, 181

Clinical information; Citizen; Website; Informatics; Internet **62**, 181

Clinical information systems; Hospital information systems; Hong Kong **62**, 113

Clinical pathways; Data mining; Time dependency pattern; Association; Sequence pattern **62**, 11

Clinical vs. administrative tasks; Computerization; Hong Kong **62**, 143

Computer-based medical record; Confidentiality; Privacy; Data ownership; Access rights **62**, 41

Computer information systems; Medical informatics; Quality improvement **62**, 1

Computerization; Clinical vs. administrative tasks; Hong Kong **62**, 143

Conceptual graphs; Free medical text document self-organisation; Knowledge representation; Information retrieval; Lattice techniques; Knowledge spaces **62**, 121

Confidentiality; Privacy; Data ownership; Computer-based medical record; Access rights **62**, 41

Cryptography; Electronic medical records; Life-long medical records; Security; World-Wide Web; XML **62**, 27

Data mining; Clinical pathways; Time dependency pattern; Association; Sequence pattern **62**, 11

Data mining; Knowledge management; Logistic regression; Hypertension; Health insurance **62**, 103

Data ownership; Confidentiality; Privacy; Computer-based medical record; Access rights **62**, 41

Decision support; Medical informatics; Design framework; Abstraction hierarchy **62**, 79

Design framework; Medical informatics; Decision support; Abstraction hierarchy **62**, 79

Diagnosis; Fuzzy set theory; Fuzzy logic; Integration of Western and Eastern medicine **62**, 165

Electronic medical records; Cryptography; Life-long medical records; Security; World-Wide Web; XML **62**, 27

Evaluation of hand-held computers; Nursing; Beside care **62**, 189

Free medical text document self-organisation; Knowledge representation; Information retrieval; Conceptual graphs; Lattice techniques; Knowledge spaces **62**, 121

Fuzzy logic; Fuzzy set theory; Integration of Western and Eastern medicine; Diagnosis **62**, 165

Fuzzy set theory; Fuzzy logic; Integration of Western and Eastern medicine; Diagnosis **62**, 165

Health information systems; Security models; UML methodology; System analysis and design **62**, 51

PII: S1386-5056(01)00181-2

Health insurance; Knowledge management; Data mining; Logistic regression; Hypertension **62**, 103

Hong Kong; Computerization; Clinical vs. administrative tasks **62**, 143

Hong Kong; Hospital information systems; Clinical information systems **62**, 113

Hospital information systems; Clinical information systems; Hong Kong **62**, 113

Hypertension; Knowledge management; Data mining; Logistic regression; Health insurance **62**, 103

Informatics; Citizen; Website; Clinical information; Internet **62**, 181

Information retrieval; Free medical text document self-organisation; Knowledge representation; Conceptual graphs; Lattice techniques; Knowledge spaces **62**, 121

Information retrieval; Medical information; Search tools; World Wide Web **62**, 155

Integration of Western and Eastern medicine; Fuzzy set theory; Fuzzy logic; Diagnosis **62**, 165

Internet; Citizen; Website; Clinical information; Informatics **62**, 181

Internet; Physician Order Entry System; World Wide Web; Intranet; Three-tier web-based structure **62**, 135

Intranet; Physician Order Entry System; World Wide Web; Internet; Three-tier web-based structure **62**, 135

Knowledge management; Data mining; Logistic regression; Hypertension; Health insurance **62**, 103

Knowledge representation; Free medical text document self-organisation; Information retrieval; Conceptual graphs; Lattice techniques; Knowledge spaces **62**, 121

Knowledge spaces; Free medical text document self-organisation; Knowledge representation; Information retrieval; Conceptual graphs; Lattice techniques **62**, 121

Lattice techniques; Free medical text document self-organisation; Knowledge representation; Information retrieval; Conceptual graphs; Knowledge spaces **62**, 121

Life-long medical records; Cryptography; Electronic medical records; Security; World-Wide Web; XML **62**, 27

Logistic regression; Knowledge management; Data mining; Hypertension; Health insurance **62**, 103

Medical informatics; Computer information systems; Quality improvement **62**, 1

Medical informatics; Design framework; Decision support; Abstraction hierarchy **62**, 79

Medical information; Information retrieval; Search tools; World Wide Web **62**, 155

Neurosurgical services; Telemedicine; Video-consultation **62**, 175

Nursing; Evaluation of hand-held computers; Beside care **62**, 189

Physician Order Entry System; World Wide Web; Intranet; Internet; Three-tier web-based structure **62**, 135

Privacy; Confidentiality; Data ownership; Computer-based medical record; Access rights **62**, 41

Quality improvement; Medical informatics; Computer information systems **62**, 1

Search tools; Medical information; Information retrieval; World Wide Web **62**, 155

Security; Cryptography; Electronic medical records; Life-long medical records; World-Wide Web; XML **62**, 27

Security models; Health information systems; UML methodology; System analysis and design **62**, 51

Sequence pattern; Clinical pathways; Data mining; Time dependency pattern; Association **62**, 11

System analysis and design; Health information systems; Security models; UML methodology **62**, 51

Telemedicine; Neurosurgical services; Video-consultation **62**, 175

Three-tier web-based structure; Physician Order Entry System; World Wide Web; Intranet; Internet **62**, 135

Time dependency pattern; Clinical pathways; Data mining; Association; Sequence pattern **62**, 11

UML methodology; Health information systems; Security models; System analysis and design **62**, 51

Video-consultation; Telemedicine; Neurosurgical services **62**, 175

Website; Citizen; Clinical information; Informatics; Internet **62**, 181

World-Wide Web; Cryptography; Electronic medical records; Life-long medical records; Security; XML **62**, 27

World Wide Web; Medical information; Information retrieval; Search tools **62**, 155

World Wide Web; Physician Order Entry System; Intranet; Internet; Three-tier web-based structure **62**, 135

XML; Cryptography; Electronic medical records; Life-long medical records; Security; World-Wide Web **62**, 27
